

Anchors

| | |
|--------------------|---|
| <code>^</code> | Start of string, or start of line in multi-line pattern |
| <code>\A</code> | Start of string |
| <code>\$</code> | End of string, or end of line in multi-line pattern |
| <code>\Z</code> | End of string |
| <code>\b</code> | Word boundary |
| <code>\B</code> | Not word boundary |
| <code>\<</code> | Start of word |
| <code>\></code> | End of word |

Character Classes

| | |
|-----------------|-------------------|
| <code>\c</code> | Control character |
| <code>\s</code> | White space |
| <code>\S</code> | Not white space |
| <code>\d</code> | Digit |
| <code>\D</code> | Not digit |
| <code>\w</code> | Word |
| <code>\W</code> | Not word |
| <code>\x</code> | Hexadecimal digit |
| <code>\O</code> | Octal digit |

POSIX

| | |
|-------------------------|--------------------------------|
| <code>[:upper:]</code> | Upper case letters |
| <code>[:lower:]</code> | Lower case letters |
| <code>[:alpha:]</code> | All letters |
| <code>[:alnum:]</code> | Digits and letters |
| <code>[:digit:]</code> | Digits |
| <code>[:xdigit:]</code> | Hexadecimal digits |
| <code>[:punct:]</code> | Punctuation |
| <code>[:blank:]</code> | Space and tab |
| <code>[:space:]</code> | Blank characters |
| <code>[:cntrl:]</code> | Control characters |
| <code>[:graph:]</code> | Printed characters |
| <code>[:print:]</code> | Printed characters and spaces |
| <code>[:word:]</code> | Digits, letters and underscore |

Assertions

| | |
|---|--------------------------|
| <code>?=</code> | Lookahead assertion |
| <code>?!</code> | Negative lookahead |
| <code>?<=</code> | Lookbehind assertion |
| <code>?!=</code> or <code>?<!</code> | Negative lookbehind |
| <code>?></code> | Once-only Subexpression |
| <code>?()</code> | Condition [if then] |
| <code>?() </code> | Condition [if then else] |
| <code>?#</code> | Comment |

Quantifiers

| | | | |
|----------------|-----------|--------------------|-----------|
| <code>*</code> | 0 or more | <code>{3}</code> | Exactly 3 |
| <code>+</code> | 1 or more | <code>{3,}</code> | 3 or more |
| <code>?</code> | 0 or 1 | <code>{3,5}</code> | 3, 4 or 5 |

Add a `?` to a quantifier to make it ungreedy.

Escape Sequences

| | |
|-----------------|----------------------------|
| <code>\</code> | Escape following character |
| <code>\Q</code> | Begin literal sequence |
| <code>\E</code> | End literal sequence |

"Escaping" is a way of treating characters which have a special meaning in regular expressions literally, rather than as special characters.

Common Metacharacters

| | | | |
|-------------------|-------------------|----------------|-----------------|
| <code>^</code> | <code>[</code> | <code>.</code> | <code>\$</code> |
| <code>{</code> | <code>*</code> | <code>(</code> | <code>\</code> |
| <code>+</code> | <code>)</code> | <code> </code> | <code>?</code> |
| <code><</code> | <code>></code> | | |

The escape character is usually `\`

Special Characters

| | |
|-------------------|---------------------|
| <code>\n</code> | New line |
| <code>\r</code> | Carriage return |
| <code>\t</code> | Tab |
| <code>\v</code> | Vertical tab |
| <code>\f</code> | Form feed |
| <code>\xxx</code> | Octal character xxx |
| <code>\xhh</code> | Hex character hh |

Groups and Ranges

| | |
|----------------------|---|
| <code>.</code> | Any character except new line (<code>\n</code>) |
| <code>(a b)</code> | a or b |
| <code>(...)</code> | Group |
| <code>(?:...)</code> | Passive (non-capturing) group |
| <code>[abc]</code> | Range (a or b or c) |
| <code>[^abc]</code> | Not (a or b or c) |
| <code>[a-q]</code> | Lower case letter from a to q |
| <code>[A-Q]</code> | Upper case letter from A to Q |
| <code>[0-7]</code> | Digit from 0 to 7 |
| <code>\x</code> | Group/subpattern number "x" |

Ranges are inclusive.

Pattern Modifiers

| | |
|------------------|--|
| <code>g</code> | Global match |
| <code>i *</code> | Case-insensitive |
| <code>m *</code> | Multiple lines |
| <code>s *</code> | Treat string as single line |
| <code>x *</code> | Allow comments and whitespace in pattern |
| <code>e *</code> | Evaluate replacement |
| <code>U *</code> | Ungreedy pattern |
| <code>*</code> | PCRE modifier |

String Replacement

| | |
|----------------------|---|
| <code>\$n</code> | nth non-passive group |
| <code>\$2</code> | "xyz" in <code>/^(abc(xyz))\$/</code> |
| <code>\$1</code> | "xyz" in <code>/^(?:abc)(xyz)\$/</code> |
| <code>\$</code> | Before matched string |
| <code>\$'</code> | After matched string |
| <code>\$+</code> | Last matched string |
| <code>\$&</code> | Entire matched string |

Some regex implementations use `\` instead of `$`.
